

# 10MWh Photovoltaic Energy Storage Container for Mining

## Overview

---

This is the first 10MWh single-container solution in the industry. With a volumetric energy density of 146Wh/L, its modular architecture enables scalability for GWh-level utility-scale energy storage projects. Compared to the mainstream 6.25MWh energy storage systems, Ganfeng's 10MWh solution stands out with higher integration, optimized AC matching, and greater adaptability for diverse application scenarios. The standardized 40ft container system can be configured with 1MW 2MW energy storage system. This innovative solution delivers comprehensive improvements in cost efficiency, energy density, deployment. Internally integrates a high-efficiency liquid cooling and liquid heating system. Insert the solar panel terminals into the "SOLA RINPUT" Port charging. Uses standard battery modules, PCS modules, BMS, EMS and other systems to form. Plug-and-play graphene energy container system designed for grid, partial-grid, and microgrid installations. It delivers clean, resilient, long-duration power storage without thermal risk, toxic materials, or complex integration.
