Data Centre in a Mine Located in The Alps. What's Next for ...

The Dolomites in the Italian Alps are to be home to Intacture, Europe's very first digital data centre being built deep inside the active underground San Romedio mine.

Work starts on data center in Italian mine outside Trento

A project to develop a data center in a mine has launched in the Italian Alps. Trentino DataMine and its partners this week announced work had started to install a facility in an active mine ...

Mine-based data centre unveiled in Italian Alps

Developed inside a dolomite mine operated by sustainable construction specialist Tassullo, Intacture is designed to serve as a cutting-edge digital infrastructure hub, providing a ...

An Early Look at the World's First Data Center in an Active Mine

The 5MW facility will host approximately 1,000 racks and is set to support colocation services starting in 2026. The result of a collaboration between the University of Trento and the ...

380 Vdc Architectures for the Modern Data Center

Major system elements are already in place and new, optimized devices are under development. Most of the presented distribution architectures concepts presented here have been adopted and verified in ...

Data center in a Trentino mine, Intacture sets a new benchmark

A subterranean data center in Trentino cuts energy use and boosts security, redefining sustainability in digital infrastructure.

Can a 5MW Data Centre Thrive in a Mine in the Italian Alps?

The simple answer is, no. Due to the characteristics of mines, the sheer volume of rock above means

electromagnetic waves will be impenetrable which, alongside the advanced levels of ...

A Look at the World's First Data Center in an Active Mine

A unique data center in the Italian Alps will soon share space with dolomite extraction and quarries storing apples, wine, and cheeses. Construction began this month at the San Romedio mine ...

All about Trentino DataMine, which will build the data center in the

Trentino DataMine is developing a data center inside an active dolomite mine, operated by Tassullo. Full details on the project (funded by the National Recovery and Resilience Plan) and the ...

Why a Mine in the Italian Alps is Home to a 5MW Data Centre

While data centres are traditionally built in industrial parks or remote open-air facilities, this mine-based project presents a new model for operators

dealing with energy constraints, land ...
