

# 50 of photovoltaic inverters are produced in China

## Overview

---

China emerged as the dominant player, contributing over 50% of shipments, driven by heightened domestic solar demand. In 2024, it got close to 50% global market share! Looking at compound annual growth rates, China had a huge surge in 2022-2023 (+163%), but it was actually India that had the biggest surge last year (+145%). China had +50% last year, in third was France with +49%, and the USA took 4th place with. The global energy landscape saw a significant shift in 2023, marked by a 56% increase in solar photovoltaic (PV) inverter shipments, to reach 536 GWac. Sungrow reported a strong first half in 2025, with revenue rising 40% year on year to CNY 43.99 billion) and net. Global shipments grew 56% last year.

### Chinese PV Industry Brief: Inverter manufacturers report solid H1

Sales from grid-connected inverters reached CNY 1.82 billion, with a margin of 26.1%, while storage inverters brought in CNY 793 million at 30.3%. Rooftop solar generation and ...

---

### Executive summary - Solar PV Global Supply Chains

This is largely because PV production is concentrated in China - mainly in the provinces of Xinjiang and Jiangsu where coal accounts for more than 75% of the annual power supply and benefits from ...

---

### Chinese companies dominate the global PV inverter market

China emerged as the dominant player, contributing over 50% of shipments, driven by heightened domestic solar demand. Huawei and Sungrow, both China-based, retained their top ...

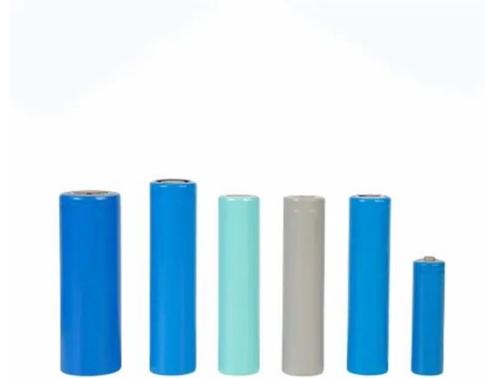

---

**China has nearly 50% of the world's**

### solar capacity: IEA

China's market had another dynamic year as internal forces pushed to absorb manufacturing capacity bringing the national market share to 59% of new global capacity.

### State of global solar energy market: Overview, China's role, ...

With more than 50 % of the raw materials being produced there already, China leads in the manufacturing of assembled PVs as well. The Chinese companies supply around 200 countries' ...

### Chinese Solar PV Market More Than 3 Times Bigger Than US & EU ...

Looking at compound annual growth rates, China had a huge surge in 2022-2023 (+163%), but it was actually India that had the biggest surge last year (+145%). China had +50% last ...

### Global surge in solar PV inverter shipments highlights China's

The top 10 PV inverter vendors, led by Chinese giants Huawei and Sungrow, controlled 81% of the global market.

Huawei and Sungrow alone captured over 50% of the global share, thanks largely to ...

---

### 56% growth in PV inverter shipments by 2023, with China in the lead

Worldwide shipments of PV inverters will reach 536 GWac in 2023, with China dominating at 50%. Global shipments of photovoltaic (PV) inverters recorded a 56% increase in 2023, reaching 536 ...

### China accounts for 50% of global PV inverter shipments

China has dominated the PV inverter market with the country accounting for half of the global shipments made in 2023, according to a Wood Mackenzie report.

---

### 50 of photovoltaic inverters are produced in China

As the photovoltaic (PV) industry continues to evolve, advancements in 50 of photovoltaic inverters are produced in

China have become critical to optimizing the utilization of ...
