

# 6gw solar energy storage

## Overview

---

energy storage market set a record for quarterly growth in Q2 2025, with 5.6 GW of installations, according to the latest U.S. renewable energy engineering, procurement and construction (EPC) contractor SOLV Energy has announced plans to build more than 6GW of new utility-scale solar and storage capacity in the US. Unveiled at the American Clean Power Association's (ACP's) Clean Power 2025 conference, held this week in Governor Kathy Hochul today announced that the New York State Public Service Commission approved a new framework for the State to achieve a nation-leading six gigawatts of energy storage by 2030, which represents at least 20 percent of the peak electricity load of New York State. This ambitious project highlights the company's commitment to sustainable energy solutions and local workforce development in the face of growing climate challenges. The deals come from long-term.
