Discover the Large-scale Outdoor Communication Base Station, designed for smart cities, communication networks, and power systems. Integrated with solar, wind, and energy storage ...

## Base stations and networks

Base Stations Enable Mobile Communications  
 Antennas Are Placed in Various Locations  
 More Mobile Devices Means More Base Stations  
 Base Station Output Power Is Low  
 Exposure Limits Are Set by Independent Organizations  
 Exposure Levels Are Much Lower Than The Limits  
 Public Access Is Restricted Where Needed  
 No Adverse Health Effects According to The Who  
 The antenna output power level is typically between 10 and 100 watts for an outdoor base station. Television transmitters, by comparison, usually have a thousand times higher output

power than outdoor base stations. Antennas mounted indoors have about the same power as mobile phones. See more on ericsson
