

# Accra clean electricity

## Overview

---

Accessing clean and efficient energy is a critical challenge for informal settlement dwellers. President John Dramani Mahama (left) at Dawa in the Greater Accra Region during a sod-cutting ceremony for the landmark 200MWp Solar for Industries (SFI) project, a step towards powering Ghana's industrial zones with clean and affordable energy. How are residents responding. Commitment to advance sustainable energy development. With an electricity access rate of 89% (2024), Ghana stands at a critical juncture to achieve universal energy access by 2030 through targeted grid expansion, distributed renewable reliable, affordable, and sustainable energy. Agency for International Development (USAID) funded the Power Africa West Africa Energy Program (WAEP) and recently held a lessons-learned event in Accra, Ghana, reviewing the last five years of work. The event brought together. Supporting skills development, knowledge sharing, and technical assistance across the clean energy value chain, while promoting the image of our members and advancing best practices that safeguard the health and safety of the sector's workers. The focus of the organisation is to create strong.
