

Are the solar-powered communication cabinet inverters owned by the government

Overview

The communication devices uncovered by the government are considered rogue because they're undisclosed. Every solar panel and battery connected to the U. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters connected to critical infrastructure grids across the country. While inverters are built to allow remote access for updates and. U.

Are the solar-powered communication cabinet inverters owned by t

Secret Tech Found In Power Grid Components Exposes Chinese ...

Experts have uncovered secret communication devices hidden in Chinese-made solar power inverters, raising serious alarms about potential sabotage of U.S. infrastructure in the event of ...

China's Unseen Cyber Threat to Energy Security

Every solar panel and battery connected to the U.S. energy grid relies on a device few people ever consider: the power inverter. In May of 2025, U.S. experts found undocumented ...

'Rogue' Chinese spyware found on solar, battery equipment

Chinese companies are required by law to cooperate with their government's intelligence agencies, which could allow the government to skirt firewalls and switch off inverters remotely.

'Rogue' communication devices

found on Chinese-made power inverters

These communication capabilities are disclosed in what's called a software bill of materials - a listing of the components that comprise the inverter package. The communication ...

U.S. officials Investigating Rogue Communication Devices in Solar Power

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters connected ...

U.S. Reassesses Chinese-Made Solar Equipment After Hidden ...

Often described as the "brain" of solar systems, these devices manage power output and grid communication. U.S. officials found communication modules in some Chinese-made inverters ...

U.S. Authorities Investigate Communication Devices in Solar Power ...

U.S. energy officials have intensified scrutiny of Chinese-manufactured

components in renewable energy infrastructure after the identification of undocumented communication devices ...

U.S. Allegedly Finds Rogue Communication Devices in Chinese-Made Solar ...

The report cites US energy officials and warns that comms devices--including cellular radios--have been found in solar inverters, which are used to connect solar panels to electricity grids,

U.S. Officials Probe Rogue Communication Devices in Solar Power Inverters

Over the past nine months, U.S. experts have identified these undocumented devices in solar power inverters and batteries from multiple Chinese suppliers during detailed security ...

Rogue communication devices found in Chinese solar power inverters

In November, the Lithuanian government passed a law blocking remote Chinese

access to solar, wind and battery installations above 100 kilowatts - by default restricting the use of Chinese
