

Are there any wind power stations now

Overview

As of February 2026, there are 1,378 utility-scale wind farms in the US, according to Cleanview's project tracker. Their total operating capacity is 158,109 MW. Click any of the links below to jump to a specific section:.

The Global Wind Power Tracker (GWPT) is a worldwide dataset of utility-scale, on and offshore wind facilities. Michael is the CEO of Cleanview. His reporting on clean energy and data centers has been cited in The New York Times, Wall Street Journal, and hundreds of other publications. The Wind Power tabulates data from a variety of players in the worldwide industry — wind farm developers, operators and owners, turbine manufacturers, to. There are currently 5,278 Wind power plants across the globe with a total capacity of 261680. It involves using wind turbines to convert the turning motion of blades, pushed by moving air (kinetic energy) into electrical energy (electricity). Modern wind turbines are.

Are there any wind power stations now

Where is new wind power in the world being built?

Today, the United States, Europe, and countries like India, Australia, Japan, Canada, China, and Brazil lead in new wind power capacity. Currently, wind power generates around 7% of ...

10 US wind energy projects starting in 2026 and beyond

Explore top U.S. wind energy projects launching from 2026, with insights on renewable trends, onshore vs offshore growth, and policy impacts on clean power.

Wind Power Plants In the US

See all 597 Wind power plants nationwide including their emissions and production

Global Wind Power Tracker

The Global Wind Power Tracker (GWPT) is a worldwide dataset of utility-scale, on and offshore wind facilities. It includes wind farm phases with capacities of 10 megawatts (MW) or more.

Wind Power Plants Across the Globe (World Map) , database.earth

Modern wind turbines are categorized by where they are installed, and how they are connected to the grid.

Wind energy database

Our data is checked and revised over a rolling period of six months. We offer one-, two- or three-year update packages on an annual, bi-annual, quarterly or monthly basis. The Wind Power can also ...

Wind Energy , Department of Energy

Modern wind turbines are categorized by where they are installed, and how they are connected to the grid.

Wind Power by Country 2026

Most "wind farms" are built on land, but a growing number of wind farms are now being constructed offshore in large bodies of water. Modern wind turbines typically appear in one of two forms: ...

Wind power in the United States

Variations in wind speed result in variations in power output from wind farms, which poses difficulties incorporating wind power into an integrated power system.

US Wind Farm Map

On this page, you can explore our real-time database of wind farms in the US. Each month, we track wind projects in the state and update our list of the largest wind farms in the US.

Wind Power Plants Across the Globe (World Map) , database.earth

Data and information about power plants and their location across the globe, plotted on an Interactive world map
