

Australia solar cabinet-based grid-connected pricing

Overview

6kW solar system in 2025 typically costs between \$4,500 and \$6,000 in most Australian states, after rebates. City averages range from about \$4,750 in Perth to over \$9,300 in Darwin. Premium systems using high-efficiency panels and branded inverters generally cost 20–30% more. The graphs below show average system prices (after STC rebates), based on 9,569 systems installed in the last 2 years. The prices in all the below tables include the up-front incentive available for small-scale systems through the Renewable Energy Target (i.e. 'STC discount') and GST – they represent the total retail. Maximum Power- Up to 16 Hybrid SkyBoxes can operate in parallel to achieve a higher power output. 16 units, for example, will provide 128 kW output power with 3040 Amps battery charging/discharging capacity (Based on 8kW model). SkyCare Monitoring- Our free remote monitoring app will display all. Switching to solar energy is a smart move for Australian homeowners looking to cut electricity costs and reduce reliance on the grid. The Australian Government is currently offering incentives and subsidies that can reduce the cost of a PV power system installation for a community or church building substantially! In.
