

Automatic uninterruptible power supply

Overview

An uninterruptible power supply, or UPS, is basically a surge protector, battery, and power inverter — which turns the battery's stored energy into usable power — in one. But if you want to keep your home Wi-Fi network and some other key electronics up and running in the event of an outage, an uninterruptible power supply, or UPS, is worth the investment. For home users, a UPS can protect desktop PCs, gaming consoles, and smart home devices from unexpected power cuts. This line interactive design saves battery power to be available when you needed it the most, during a power outage 6 NEMA 5-15R outlets. An uninterruptible power supply (UPS) is a type of backup battery that will continue to provide electrical power to the electronics that you have plugged into it even if electricity from your home outlets cuts out.
