

# Biofuel production by year

## Overview

---

Find maps and charts showing transportation data and trends related to alternative fuels and vehicles. How much ethanol is produced, imported, exported, and consumed in the United States?

How much biodiesel is produced, imported, exported, and consumed in the United States?

How many alternative fuel and hybrid vehicles are there in the United States?

. The United States produces and consumes renewable energy sourced from agriculture and forestlands on a commercial scale that impacts energy markets. Among these renewable energy sources are biofuels, an important component of fuel consumption in the U. Significant biofuels. Biofuels are fuels produced from biomass and organic matter, which can be made from crops such as cereals or sugarcane, wood, grasses, or biological waste such as animal fats and oils. 09 billion, with projections indicating growth to USD 181. In France. 23, China produced 25% of global biopower (204 TWh). Top 3 countries for bioenergy in reached 116 billion liters (70% o liquid biofuels).

## Biofuel production by year

---

### Biofuels explained

Data for the United States for 2022, except where noted. Last updated: Octo, with most recent data available. How much ethanol is produced, imported, exported, and consumed in the United States? How ...

### Biofuels Statistics By Product Type, Consumption And Facts (2025)

Biofuels Statistics: In 2024, the biofuel market was valued at approximately USD 173.09 billion, with projections indicating growth to USD 181.4 billion in 2025. The United States led in

### 11th Edition Global Bioenergy Statistics Report 2024

FAME biodiesel production neared 50 billion liters. Indonesia led with 14 billion liters (palm oil), followed by the EU at 13 billion liters (rapeseed, used co

## Global biofuel industry

---

Worldwide biofuel production has grown to around 200 billion liters per year and is expected to continue its steady growth in the future. Discover all statistics and data on Biofuel industry

### Global biofuel production: by region, by liquid fuel?

This data-file estimates global biofuel production, for liquid biofuels, by region, by fuel, by year, based on industry data, technical papers and our own facility-by-facility tracking.

### Biofuels Production and Development in the United States

Transitioning to biofuels in the U.S. transportation sector presents a host of environmental, economic, and strategic advantages. Environmentally, biofuels offer a promising avenue for reducing greenhouse gas (GHG) ...

### Bioenergy and Biofuels

Which countries produce biofuels? Where in the world are these biofuels produced? You can see production -- measured in terms of energy content --

by country in the map below. Both the United States ...
