

Can photovoltaic panels be directly laid on the roof

Overview

Solar panels can't be put on a roof without first having mounting brackets installed. The solar panels are shielded from the elements by the mounting and solar racking system, which can withstand harsh weather such as high winds, rain, snow, and other forms of precipitation. Replacing an old roof before installation saves \$2,000-\$5,000 compared to removing and. Yes, you can install solar panels flat, but they will experience a degree of energy loss without the slightest inclination toward the sunlight. Although it certainly is advantageous to have a roof that is inclined in the sun's direction, a flat surface will also do.

Can photovoltaic panels be directly laid on the roof
