

Can photovoltaic panels sell electricity

Overview

It works by sending extra electricity your panels produce back to the power grid, sometimes even letting you sell solar energy back to the grid. Most homeowners see \$600-1,500 in annual bill reductions rather than income payments. Location dramatically impacts profitability - With 34 states plus D. In return, you earn credits that can lower your utility. As solar power becomes more prevalent, many homeowners and businesses are generating more electricity than they can use. This excess energy can be sold back to the grid, providing additional income and contributing to a more sustainable energy system.
