

# Can solar container lithium battery packs be used separately

## Overview

---

It is recommended that fully loaded containers of battery packs be stowed on deck only and separated (at least 1 container in between) from other containers with combustible and corrosive materials of IMDG Class 3, 4 and 8. This guide provides scenario-based situations that outline the applicable requirements that a shipper must follow to ship packages of lithium cells and batteries in various configurations. It's very stable, tolerant of high temperatures, and doesn't. Units which have two or more cells that are commonly referred to as "battery packs", "modules" or "battery assemblies" having the primary function of providing a source of power to another piece of. There are several key things to consider when managing the transportation of these. Lithium-ion batteries power everything from smartphones to electric vehicles, but they are highly sensitive to heat, pressure, and punctures. Improper packaging can result in thermal runaway, causing fires or explosions. Department of Transportation's (DOT).
