

Can solar power generation be installed on the roof

Overview

Installing solar panels on your roof can both save you energy costs and reduce your home's environmental impact. Market Growth Continues Accelerating: With over 4.4 million American homes now powered by solar and approximately 1 in 30 homes having panels, the industry installed a record 50 GW of new capacity in 2024. Even though there are some DIY solar panel options, installing them is a highly complex project, and you'll still need assistance from an experienced professional. Join This Old House. Roof solar panels allow homeowners to harness the sun's energy, reducing their reliance on traditional electricity sources and lowering their energy bills. This guide will walk you through each.

Can solar power generation be installed on the roof
