

Can vacant land be used to install photovoltaic panels

Overview

Vacant Land can be a great place to put ground-mounted solar panels on your property. Your new solar farm can generate electricity for your facility using only vacant land adjacent to your facility and save you a ton of money in the process. Two qualifying questions you want to ask if you are. Unused land or structures can become solar sites specifically when paired with the sun as a powerful energy source. The power. Farmers can benefit from solar energy in several ways—by leasing farmland for solar; installing a solar system on a house, barn, or other building; or through agrivoltaics. Agrivoltaics is defined as agriculture, such as crop production, livestock grazing, and pollinator habitat, located underneath. The installation of photovoltaic (PV) plants on vacant land and brownfields is a great opportunity to use abandoned or other unused land for solar energy production.
