

Can you make photovoltaic panels yourself

Overview

The answer is yes—but don't grab your soldering iron and solar cells just yet. This guide explains whether you should make your own solar panel, what's involved, how much it costs, and when it's smarter to buy a factory-made module. The supplies are readily available and inexpensive, and no professional skills are required beyond. Solar energy is a renewable source of energy that not only benefits you but the environment as well. In fact, we surveyed 1,000 homeowners and found that less than 0.3% chose to install their panels themselves. You can easily set up a DIY solar system if you're comfortable with basic construction, running power tools, and electrical wiring. You can build it yourself, hire local laborers to help, or do a mix of both.
