

Canberra school energy storage

Overview

Several initiatives are supporting schools in adopting solar and batteries, and bringing these assets together to form Virtual Power Plants or VPPs. As part of the Big Canberra Battery project, the ACT Government is delivering battery storage systems including a 100 kW behind-the-meter battery at Mount Stromlo High School. Supporting the Territory's transition to a net zero emissions and an electrified city, the battery will store excess solar. Mount Stromlo High School is now home to a new 100 kW battery, installed as part of the ACT Government's Big Canberra Battery project to support the Territory's transition to net-zero emissions and an electrified city. The ACT has a legislated target for net-zero emissions by 2045. The batteries then distribute stored electricity when it's needed.

Canberra school energy storage

ACT powers up local school with new battery installation

The ACT Government is delivering battery storage systems including a 100 kW behind-the-meter battery at Mount Stromlo High School as part of its Big Canberra Battery project.

Advancing Canberra's Energy Landscape with Community Battery Energy

Over the next year, three new community-scale battery energy storage systems (BESS) will be deployed across Canberra to optimize solar energy usage, stabilize grid demand, and ...

Big Canberra Battery - Williamsdale BESS

The large-scale battery storage system will deliver 250 megawatts (MW) of power, store renewable energy and support grid reliability. Enough energy to power one-third of Canberra for two ...

Why schools are powering up with

batteries

Battery storage is becoming the new norm in solar schools, with more than 130 facilities across the country adopting storage solutions, aiming to unlock energy and emission savings and ...

- ✓ 50KW/100KWH
- ✓ HIGHER POWER OUTPUT IN OFF-GRID MODE
- ✓ CONVENIENT OPERATION & MAINTENANCE
- ✓ PRE-WIRED

ENERGY STORAGE IN THE ACT

Energy Storage is critical for ACT's 100% renewables and net-zero target. Helps to put downward pressure on electricity price paid by ACT consumers. Reduces the need for electricity network ...

Mount Stromlo High School joins ACT's Big Battery network

The behind-the-meter battery stores excess solar energy generated onsite and helps power the school in the evenings and overnight, cutting electricity bills and easing pressure on the grid.

Mount Stromlo High School powers up with new battery installation

As part of the Big Canberra Battery project, the ACT Government is delivering battery storage systems

including a 100 kW behind-the-meter battery at Mount Stromlo High School.

Canberra Microgrid & Solar Battery Push -- Future Energy

This initiative includes the deployment of three distributed energy storage units in the Casey, Dickson, and Fadden distribution zones, with commissioning scheduled for the first quarter of 2025.

Milestone for Big Canberra Battery

This ACT Government has partnered with Eku Energy on this project. Construction will begin later this year. The Big Canberra Battery will be capable of delivering 250 MW of power - more ...

From Solar to Storage: Your Guide to Canberra's Energetic Makeover

Canberra is taking bold steps towards a sustainable future, with recent initiatives set to transform how we generate, store, and use energy. Here's what you, as a

Canberra resident, need to ...
