

# China s new energy storage applications

## Overview

---

In February 2025, China shelved a requirement that new domestic wind and solar projects be bundled with energy storage. 7GW, representing an 85% year-on-year rise. The figures are taken from the recently released 2025 China Energy Storage Industry Data Report published by CNESA. China's new energy storage capacity has exceeded 100 million kilowatts, marking a major milestone in the nation's transition toward a new-type energy system and consolidating its global lead in renewable energy development, said officials at an energy storage sub-forum on Nov 5. "By the end of. In Shandong, Xinjiang, Hebei, Qinghai, and Inner Mongolia, several 100-MW-level projects have either started construction or successfully connected to the grid. Technologies involved include flywheel storage, lithium iron phosphate (LFP) batteries, hydrogen storage, and more - together painting a. By the end of 2023, China had completed and put into operation a cumulative installed capacity of new type energy storage projects reaching 31. The newly added installed capacity in 2023 was approximately 22.

## China s new energy storage applications

---

### China added 66.43 GW of new-type energy storage in 2025

CNESA said the leading application scenario has shifted toward standalone energy storage, which accounted for 58%, while user-side storage fell to 8% and thermal-plus-storage ...

---

### China targets 180 GW of new energy storage by 2027 in ambitious ...

China aims to add more than 100 GW of new energy storage (primarily battery storage, excluding pumped hydro) by 2027, according to a new action plan presented by authorities on Friday.

---

### China leads the world in new-type energy storage capacity

In a significant technological advancement, the country's largest "coal-to-power plus molten salt" storage project, located in Suzhou, east China's Anhui province, recently completed a ...

---

## CHINA'S ACCELERATING GROWTH IN NEW TYPE ENERGY ...

By the end of 2023, China had completed and put into operation a cumulative installed capacity of new type energy storage projects reaching 31.4GW / 66.9GWh, with an average storage duration of 2.1 ...

### **After the mandate: China's energy storage sector one year on**

Energy After the mandate: China's energy storage sector one year on With clean energy projects no longer needing to be bundled with energy storage, companies are finding new ...

### **Already world's top energy-storing nation, China to supercharge**

Released jointly by the National Development and Reform Commission and the National Energy Administration (NEA) on Friday, the plan also aims to expand energy storage applications, ...

### **3,200 MWh New Energy Storage Projects Reach Key Milestones**

Recently, multiple new energy storage projects across China have reached important milestones. In Shandong, Xinjiang, Hebei, Qinghai, and Inner

Mongolia, several 100-MW-level ...

**At nearly 200GWh, China's new energy storage deployment rate hit ...**

In 2025, the top 10 regions in China for newly commissioned new energy storage projects were Inner Mongolia, Xinjiang, Hebei, Yunnan, Gansu, Shandong, Jiangsu, Ningxia, Qingdao and ...

**New energy storage tops 100m kW**

China's new energy storage capacity has exceeded 100 million kilowatts, marking a major milestone in the nation's transition toward a new-type energy system and consolidating its ...

**Energy storage in China drives a renewable power surge**

Energy storage in China expands rapidly as renewables exceed 60% of national power capacity, reshaping the global

electricity mix.
