

# Clean electricity hanoi

## Overview

---

The Hanoi Urban Environment Company (URENCO) and its partners (T&T Group and 3 leading Korean companies) agreed in September 2017 to jointly design, build, finance and operate a facility that will gather, process, and treat methane gas emitted from decomposing garbage to produce. The Hanoi Urban Environment Company (URENCO) and its partners (T&T Group and 3 leading Korean companies) agreed in September 2017 to jointly design, build, finance and operate a facility that will gather, process, and treat methane gas emitted from decomposing garbage to produce. For comparison, the average production and purchase cost of electricity for Vietnam Electricity (EVN) (with coal-fired and gas-fired power accounting for 55% of total electricity generation) is around \$0. This cost competitiveness is a crucial driver for the adoption of renewable. A waste-to-energy plant built by a Chinese enterprise in Vietnam's capital city Hanoi, has transformed the city's biggest landfill into a major power station, generating electricity enough for the daily consumption of around 100,000 households. With around 71,000 tons of garbage generated per day. The \$320 million project began construction in August 2019 and today it could process 5,000 tonnes of waste on daily basis. The Soc Son Waste-to-Energy Plant which is world's second-biggest facility of its kind has been inaugurated in Trung Gia commune, Hanoi, Vietnam. The WtE plant is capable of. Effective waste treatment for energy generation will help ensure energy security, reduce environmental pollution, and contribute to effective land use and green sustainable economic development.
