

Common Problems with Photovoltaic Panels

Overview

While solar panels are built to last 25–30 years, daily exposure to heat, moisture, and debris — along with installation or electrical issues — can lead to performance loss over time. Solar panels have become a widely adopted and eco-friendly energy solution. However, like any technology, they are susceptible to issues affecting performance. From shading and weather damage to inverter malfunctions and wiring faults, most solar problems are preventable with. Solar panels are hot (often quite literally!), they save you quite a bit of money and may even earn you some, and are a step towards a lower carbon future. They are low maintenance, super long-lasting – and that's not even all the perks they have. The inverter converts solar energy into electricity you can use in your home. Below, we explore ten common problems.
