

# Diy solar AC power generation

## Overview

---

To make a solar-powered air conditioner, you'll need materials like a large computer fan, a heat sink, a 12V power supply or a solar panel, a Peltier, and heat paste. Connect the fan to the power supply and. Building a weatherproof DIY solar generator involves mounting and wiring a battery, charge controller, inverter, trickle charger, and fusing inside a weatherproof case. Do you have what it takes to make one yourself?

My family owns a cozy off-grid cabin in the hills, but since there's no electricity, I'd only stay there. I teach engineering to high school students, at St Marys Secondary College in Nathalia VIC Australia I was given a design challenge by the residents of foot rot flats\*, build an air conditioner that requires no mains power and no piped water. There are various online tutorials and how-to guides available that demonstrate how to make one.
