

# Dominican PV Energy Storage Policy

## Overview

---

The Dominican Republic has launched a tender for up to 600 MW of solar and wind capacity, requiring projects to include at least four hours of battery storage to support stability in the National Interconnected Electric System (SENI). From ESS News The Superintendency of Electricity (SIE) has. Santo Domingo - The executive director of the National Energy Commission (CNE), Edward Veras, announced during Energyyear Caribe 2024 that the CNE's board of directors approved the modification of Resolution CNE-AD-0004-2023, which raises the storage requirements for renewable energy projects. This focus is central to the latest Dominican Republic energy news as the nation pursues a more sustainable future. Marking a national first, the bidding process mandates the inclusion of battery energy. Public Disclosure Authorized Public Disclosure Authorized Public Disclosure Authorized Public Disclosure Authorized The DR needs to prioritize energy sector decarbonization to meet its 2030 NDCs and increase energy security Country Climate and Development Report 2 Reliance on fossil fuels in the. Dominican Republic s new energy photovoltaic energy storage policy Page 1/5 SolarCabinet Energy Dominican Republic s new energy photovoltaic energy storage policy Powered by SolarCabinet Energy Page 2/5 Overview The resolution stipulates the renewables sites must incorporate battery energy storage.
