

# Electric vehicle charging infrastructure belize

## Overview

---

Invest in EV charging infrastructure which will allow Belize to reduce its carbon footprint and tap into a growing global trend of automotive electrification. We have not finalized all locations with formal agreements with the parking space owners. Earlier today, the Belize City Council, the United Nations Development Programme, and other government ministries officially launched the E-bus service in the downtown area. This type of charger is great in an emergency when the driver is running low on charge and needs to plug into a readily available outlet.
