

Electric vehicle infrastructure kazakhstan

Overview

Despite growing interest in environmentally friendly transport, the share of electric vehicles (EVs) in Kazakhstan remains modest. This is due to their relatively late entry into the domestic market, persistent public skepticism, and an underdeveloped charging infrastructure. Source Ambitious EV. In 2024, electric vehicles will account for 16% of the total number of vehicles in the global car market [1]. Under the roadmap, authorities are going to create the infrastructure necessary for electric cars in all big cities.
