

Electricity distribution dublin

Overview

Find detailed information on Electric Power Generation, Transmission and Distribution companies in Dublin, Ireland, including financial statements, sales and marketing contacts, top competitors, and firmographic insights. Since the first national electricity network in 1927 and rural electrification, which took place between 1947 and 1956, electricity infrastructure has been key in building a modern Ireland. To support renewable energy, we're upgrading our transmission system and adding new IT and communication. The electricity sectors of the Republic of Ireland and Northern Ireland are integrated and supply 2.5 million customers from a combination of coal, peat, natural gas, wind and hydropower. In 2022, 34 TWh were generated.
