

Estonia electric vehicle infrastructure

Overview

With the support of the European Union, 122 new charging points for electric vehicles will be built in 60 locations across Estonia. From Estonia, support was allocated to the companies Enefit Volt, Eleport and Elektrum. The analysis of Estonia's public charging infrastructure dedicated to light-duty vehicles, published today by the Competition Authority, reveals that the infrastructure is only developing in major settlements, where strong competition for positioning also exists. Even before the. Enefit fast chargers can be found, among other places, in the parking lots of Rimi and Selver hypermarkets.
