

Four-core photovoltaic panel interface

Overview

MC4 connectors are specialized electrical connectors designed specifically for solar panel systems. They are used to establish secure and weatherproof connections between solar panels, inverters, and other components in a photovoltaic (PV) system. The name “MC4” means “Multi-Contact, 4 millimeters. Most solar panels use MC4. NOTE: There are multiple types of interlocking PV connectors. The development of them can be traced back to early advancements in solar technology during the 1970s and 1980s.
