

# Generac power cell cost

## Overview

---

The Generac PWRcell system typically costs around \$20,000 for a base configuration, though prices vary based on capacity and installation factors. Adding 22 solar panels, including installation, costs \$29,000. The PWRcell—pronounced "power cell"—is a home battery that stores energy generated by a solar panel system to provide 9 to 18 kWh of backup power in an outage. The PWRcell battery can charge from solar, the grid, or even one of Generac's home standby. Premium Pricing Reflects Advanced Features But Limits Market Appeal: At \$1,278-\$1,778 per kWh, PWRcell 2 costs significantly more than Tesla Powerwall 3 (~\$1,222/kWh) and other competitors, positioning it as a premium solution that may not appeal to cost-conscious buyers despite its advanced. The Generac PWRcell's pricing is also affected by how many panels are available and whether you have solar panels. You may need a few PWRcell batteries to truly go "off the grid. " A qualified EnergySage-approved installer can give you the best.
