

# How is the photovoltaic panel price calculated

## Overview

---

Solar photovoltaic module prices refer to the cost of the solar panel itself, and do not include installation or other system components. Average price of solar modules, expressed in US dollars per watt, adjusted for inflation. Data source: IRENA (2025); Nemet (2009); Farmer and Lafond (2016) – Learn more about this data Note: Costs are expressed in constant 2024 US\$ per watt. Global estimates are used before 2010; European market. How much do solar panels cost on average?

As of 2026, the average cost of residential solar panels in the U. is between \$15,000 and \$25,000 before incentives. This typically translates to about \$2.50 per watt of installed capacity (more on price per watt below). Using these numbers. Our estimator shows how many solar panels your home needs We generate an online cost and savings estimate You choose how many solar companies send you an exact price by email or text Click on your state for solar panels cost localized to your city or use the solar calculator above to see the live. Solar panels cost about \$30,500 on average—but often pay for themselves several times over through 25-30 years of electricity savings. Why trust EnergySage?

If you've been putting off solar because of sticker shock, this might change your mind: Most homeowners save \$37,000 to \$154,000 over 25.
