

How much does 10 kilowatts of solar energy cost

Overview

On average, a 10 kW solar panel system costs \$25,400, according to real-world quotes on the EnergySage Marketplace from 2025 data. But your actual price will depend on factors like your roof's complexity, local labor costs, the equipment you choose, and what incentives are available in your area. Your actual cost depends on your home's energy needs, roof characteristics, location and other factors, all of which we'll break down in. On average, a 10kW solar system will produce about 30 to 50 kilowatt-hours (kWh) per day. That is about 1,000 to 1,500 kWh per month, or about 12,000 to 18,000 kWh per year. And since the average cost per watt of electricity varies from state to state, the price you pay will depend on the state you live in. This typically translates to about \$2.
