

How much does a 48V 4kW inverter cost

Overview

The price of a 48V 4kW hybrid solar inverter typically ranges from \$800 to \$2,500 USD, depending on brand, features, and region. Basic models from Chinese manufacturers (e., Growatt, Deye, Luxpower) start around \$800-\$1,200. When selecting the best 48V 4kW hybrid solar inverter for your energy system, prioritize high peak efficiency (above 95%), compatibility with lithium batteries, strong surge capacity (at least 6kW), and built-in MPPT charge controllers. A reliable model should support both on-grid and off-grid. We'll repair, replace, or reimburse you up to the purchase price (excluding tax). You're covered for up to \$5,000 in total claims per 12-month period. Cancel anytime - your plan renews monthly until canceled. ● Adopts three-stage AC charging. Premium Technology Justifies Higher Costs: While SolarEdge systems cost 20-35% more than basic string inverters (\$5,500-\$9,000 vs \$3,000-\$5,000 for residential installations), the module-level optimization delivers 15-25% higher energy production, typically paying for the premium within 2-3 years. The Bettsun 4KW 48V Hybrid inverter supports a wide PV input voltage range of 110-450Vdc, ensuring continuous performance in regions with unstable grids. Solar inverters convert DC solar power into usable.
