

# How to keep the photovoltaic panel lights on during the day

## Overview

---

To make solar lights shine longer, position panels where they soak up 6-8 hours of sunlight daily. Dust them often for better energy absorption. Place lights in sunny spots, away from shadows or artificial light. Keep panels clean for efficient. Seeing your solar lights shining brightly in broad daylight?

This common solar light problem can waste valuable energy and significantly shorten the lifespan of your solar light batteries. This not only makes your backyard a breeze but also helps with electric bills and maintains a healthy environment. Automatic sensors usually manage these lights, 3.
