How to make an ic2 module solar generator

Overview

The solar panel recipe was changed to the current recipe from this: I:energyGeneratorSolar=100 and change it to any number you want (100 = 1 EU/t). On modpack servers, go to IC2. You can change the value there. The Solar Panel will only create EU during a clear day, and if there are no opaque blocks above it. You can determine whether or not your solar panel is working by. Solar Panels are generators that utilize the energy of the Sun to generate EU and thus require an unobstructed view of the sky (you can place glass over it). They require little effort to set up correctly, and each one consistently provides 1 EU/t on clear, sunny days, and as long as the more expensive GregTech recipe is not enabled, they're also fairly affordable.

# How to make an ic2 module solar generator

Industrial Craft 2 solar panels

In this episode I will be showing you how to construct a solar panel on minecraft using the IC2 mod.

Solar panel production line (automated)

I have gone round to each chest where i deposit the raw materials and put a sign up telling what goes where, including how much. if you go round you can make 6 solar panels as this is ...

Solar Panel (IndustrialCraft)

Due to the relative weakness of power generation, Solar Panels are often assembled into so-called Solar Flowers (when using Copper Cable), whereby as many Solar Panels as possible are connected to a ...

Solar Panel (IndustrialCraft)

These constructions provide the benefit of compact and relatively cheap Solar Panel arrangements without energy losses. This was the most efficient design that existed in IC1 and earlier versions of IC2.
