

# Huawei South Korea Battery Energy Storage Project

## Overview

---

SEOUL, May 26 (AJP) - South Korea has launched its most ambitious energy storage initiative yet, opening the door to what officials estimate could become a \$29 billion market by 2038 — offering a much-needed boost to domestic battery manufacturers grappling with a. SEOUL, May 26 (AJP) - South Korea has launched its most ambitious energy storage initiative yet, opening the door to what officials estimate could become a \$29 billion market by 2038 — offering a much-needed boost to domestic battery manufacturers grappling with a. st major government-led deployment of its kind. The project is part of a broader effort to modernize South Korea's power grid elping secure a more sustainable energy future. The rated storage capacity of the project is 12,000kWh. The electro-chemical battery storage project uses lithium-ion battery. The Ulsan Substation Energy Storage System is a 32,000kW lithium-ion battery energy storage project located in Namgu, Ulsan, South Korea. The ceremony marking the completion of construction was held on Thursday, September 27, at the 154 kV Bubuk. Billed as Asia's largest.
