

# Installation of photovoltaic panels on the thermos barrel

## Overview

---

To connect a solar-powered thermos effectively, follow these essential steps: 1. Identify the components, 2. Install the solar panels and connect them to a battery. The most common way to install solar thermal collectors is to mount them directly onto your property's rafters using specialist roof hooks, mounting frames and clamps. (hereafter referred to as “JA Solar”). Installers should follow all safety precautions described in this guide as well as local codes. This DIY solar panel installation guide provides an overview of the requirements and steps necessary to successfully bring your solar project to fruition. From planning and permitting to interconnection and maintenance, we will walk you through every aspect of the installation process.

### Mounting Methods Solar Thermal Systems

Mounting Methods Solar Thermal Systems  
On-Roof Solar Thermal  
In Roof Solar Thermal  
Solar Tiles  
Flat Roof Mounting  
Ground Mounting  
There Are Three Main Systems For Mounting A Solar Thermal Array  
The standard on roof panel mounting system is constructed of stainless steel brackets that are fitted underneath the solar thermal panels. The brackets are then attached directly to the roof rafters. Rails are then fixed to the brackets which sit directly above the roof and the solar thermal panels are then fixed securely in place on the rails.
