

Installing solar power generation in rural areas to make money

Overview

Farmers can benefit from solar energy in several ways—by leasing farmland for solar; installing a solar system on a house, barn, or other building; or through agrivoltaics. With installation costs plummeting 70% over the past decade and government incentives reaching unprecedented levels, rural solar has evolved from an idealistic dream to a financially compelling reality. The timing has never been more critical. In the US, the 30% federal tax credit faces changes. The program provides guaranteed loan financing and grant funding to agricultural producers and rural small businesses for renewable energy systems or to make energy efficiency improvements. From farms to fairgrounds, small towns to.

Installing solar power generation in rural areas to make money

Farmer's Guide to Going Solar , Department of Energy

Farmers can benefit from solar energy in several ways--by leasing farmland for solar; installing a solar system on a house, barn, or other building; or through agrivoltaics.
