

# Is it necessary to install a photovoltaic power station for energy storage

## Overview

---

The short answer: it depends on your goals. While solar panels alone can generate clean energy, integrating storage unlocks advantages like: "Energy storage isn't just an add-on—it's becoming the backbone of resilient solar projects. " - Industry Analyst Report, 2023. The AES Lawai Solar Project in Kauai, Hawaii has a 100 megawatt-hour battery energy storage system paired with a solar photovoltaic system. Sometimes two is better than one. The reason: Solar energy is not always produced at the time.
