

# Juba outdoor energy storage field

## Overview

---

The 20 MW solar PV plant, located in Juba, the capital city, will have a 14 MWh battery energy storage system & will connect 16,000 households in the world's least electrified country. This project marks South Sudan's first public-private partnership (PPP) in the renewable energy. The Juba Solar Power Station is a proposed 20 MW (27,000 hp) solar power plant in South Sudan. The solar farm is under development by a consortium comprising Elsewedy Electric Company of Egypt, Asunim Solar from the United Arab Emirates (UAE) and I-kWh Company, an energy consultancy firm also based. Ezra Group, a South Sudanese family-run conglomerate, last month announced the launch of South Sudan's first major renewable energy project. This 58MW/116MWh facility – equivalent to powering 35,000 homes daily – demonstrates how modern battery technology can transform energy accessibility. The BESS will store energy from the solar plant, providing on-demand power, stabilizing the grid, and ensuring consistent.
