

Light-powered solar container system

Overview

Instead of employing noisy diesel generators or exposed power lines, these plug-and-play systems include solar panels, inverters, batteries, and all else in a shipping container—ready to deploy, ship, go, and turn on. The lights will be a string of 4 DC LED A bulbs which operate on a timer switch. The system is designed with plug and play (PnP) connectors for easy assembly. The lights and timer switch easily setup. Upgrade your shipping container home or office with a solar power kit and make the transition to off the grid living effortless! This system is designed to easily connect all your essential appliances (air-conditioners, computers, lights, microwaves and more). It's equipped with a 3000 watt power. Shipping Container Solar Lighting Kits provide lighting in shipping containers and storage areas with 2 days of battery technology for cloudy, rainy, or snowy days with 8 hours per day of run time.
