

# Lithium batteries banned in dublin energy storage installation

## Overview

---

All batteries in Ireland are manufactured, sold, and operated in line with relevant EU regulation and standards, this includes safety certification and labelling for the marketing and the putting into service of batteries used in grid-scale electrical storage. All batteries in Ireland are manufactured, sold, and operated in line with relevant EU regulation and standards, this includes safety certification and labelling for the marketing and the putting into service of batteries used in grid-scale electrical storage. Deputy Louis O'Hara asked the Minister for the Environment, Climate and Communications the safety and environmental regulations in place for battery energy storage system facilities; and if he will make a statement on the matter. [17934/25] In line with CAP Action EL/2416, the Electricity Storage. Unlike the UK, or mainland Europe Ireland has yet to introduce dedicated national regulations to tackle the growing risks associated with lithium-ion batteries, particularly in the e-bike sector. The Programme for Government – Our Shared Future. RWE Renewables' first European-based battery storage project is the 8.5 megawatt (MW) facility in Stephenstown in County Dublin. The facility is capable of providing a rapid delivery of electricity into the power grid in order to balance fluctuations resulting from the growing proportion of.
