

Longlin free installation of rooftop photovoltaic panels

Overview

The short answer is no, you can't get free solar panels from the government. That being said, there are many incentives put in place by the Federal Government to help homeowners transition to solar energy to power their homes. The ITC — also known as the Federal Solar Tax Credit — is a popular tax rebate program offered by the US Federal. The Department of Energy is aware of claims of offers for free solar panels or that solar companies must provide solar panels for free if requested. Solar savings are calculated using roof size and shape, shaded roof areas, local weather, local electricity prices, solar costs, and estimated incentives over time. Reduce or eliminate your energy bills, and potentially earn money by selling excess energy back to LIPA.
