

Megawatt-scale solar energy in the Dominican Republic

Overview

The country added more than 600 MW of clean capacity in 2025 with 13 new solar and wind plants connected to the National Interconnected Power System. It is now preparing to award a 600 MW tender attracting almost 3 GW in private proposals. The Dominican Republic's energy transition continues to. In a significant move to modernize the national power grid, the Unified Council of Electricity Companies (CUED) has unveiled a public tender for up to 600 megawatts (MW) of new renewable energy generation. Marking a national first, the bidding process mandates the inclusion of battery energy. DP World Caucedo, a pivotal Special Economic Zone (SEZ) in the Dominican Republic, has achieved a landmark milestone by transitioning to operations powered entirely by renewable energy. 6 MWp Cotoperi Solar complex in the Dominican Republic, now considered the largest photovoltaic installation in Central America and the Caribbean.

Megawatt-scale solar energy in the Dominican Republic

Dominican Republic solar energy: Stunning 2MW Milestone

The facility has successfully reached net-zero carbon emissions from its direct operations by commissioning a state-of-the-art 11.2-megawatt solar plant. This impressive installation features ...

How the Dominican Republic is charting its path towards renewable

In 2020, according to the Dominican government, the electricity generation capacity from renewable sources was 555.5 MW; by the end of 2023, it had increased to 1,126.25 MW, ...

Dominican Republic

EGE Haina has received approval for a 100 MW renewable energy project in the Dominican Republic, comprising a wind farm in Valverde province and a solar farm in San Cristóbal ...

Dominican Republic surpasses 2.7

GW of renewables as 600 MW ...

The Dominican Republic's energy transition continues to gather pace. According to the latest information compiled by Energía Estratégica, the country closed 2024 with 2,069 MW of ...

Dominican Republic surpasses 2.7 GW of renewables as 600 MW

With these new projects, the Dominican Republic now has 80 renewable power plants in operation, representing close to 45% of total installed capacity within the SENI, which stands at ...

Dominican Republic launches first 600 MW renewable energy tender ...

The solicitation specifically seeks to contract new wind and solar photovoltaic generation bundled with storage systems, with project capacities ranging from 20 MW to 300 MW, to reach the ...

Dominican Republic bets on renewable energies with the largest solar

At a corporate level, Acciona Energía presents itself as the ****largest 100% renewable energy company free from**

fossil legacy worldwide**, with an installed capacity exceeding **15,400 ...

Dominican Republic's new solar projects add over 140 MW

The installed renewable energy capacity in the Dominican Republic rose to 1,126.25 MW at the end of 2023 from 555.5 MW in 2020. There are currently over 1,300 MW of solar photovoltaic ...

Dominican Republic Opens 162 MW Cotoperi Solar Complex to Boost ...

Dominican Republic Vice President Raquel Peña has inaugurated the 162-megawatt-peak Cotoperi Solar complex in Guaymate, La Romana, marking the country's latest expansion of ...

Dominican Republic tenders up to 600 MW solar, wind with mandatory

The Dominican Republic has launched a tender for up to 600 MW of solar and

wind capacity, requiring projects to include at least four hours of battery storage to support stability in the
