

# New solar panels 2023

## Overview

---

Over 32 gigawatts of new solar capacity is expected in 2023 – a 52% increase from 2022. What follows are the Top Solar Panel Products for 2023. Take a look at this year's innovative products (listed alphabetically by company) within the solar panel and module category. This residential module offers a combination of beautiful. The widespread adoption of solar technology has been a notable trend, driven not only by environmental considerations but increasingly by changing economics. But going solar involves a lot of scientific and technical jargon. It might look complicated — which is okay because there are numerous resources available that can help you.
