

New solar panels in Belgium

Overview

Brussels (Brussels Morning Newspaper) – Belgium is launching plug-in solar panels for balconies, starting on April 1st. Energy Minister Zuhal Demir supports this with an 800-watt limit per household to ensure safety and efficiency. As the nation transitions away from nuclear power, solar has become a cornerstone of its strategy to achieve net-zero emissions by 2050. Solar power in Belgium reached an installed capacity of 9.5 GW in 2023. Self-consumption and resale : In Belgium, you can consume the electricity you produce and sell the surplus. Service life : Recent models of solar panels last between 25 and 30 years. INEOS Inovyn aims to cut CO2 emissions by over 33% by 2030 and achieve Net Zero by 2050.
