

# New solar panels in Mozambique

## Overview

---

The new developments include a powerful 100 MW solar plant in Cabo Delgado and a 60 MW facility in Nampula. These provinces are considered prime locations for solar energy projects due to their high levels of solar irradiation, making them ideal for maximizing energy generation. Over recent years, Mozambique has hit headlines for major natural gas discoveries. Once the gas flows in earnest, it could transform the country into a leading producer and exporter. A community of farmers found new hope in the construction of the Mocuba solar plant that is providing consistent, clean, and affordable energy to homes and small businesses in Zambezia region, Mozambique. By Erin Baldwin and Luiana João. Photography by Emídio Jozine/IFC Intern learning from mentor. A new US\$110. According to documents shared with Portuguese news agency Lusa, the renewable energy project will also “allow the creation, directly and indirectly. Lumen Solar LTDA, based in Maputo, Mozambique, specializes in project and operations management for solar, hybrid, and geothermal energy solutions for domestic, commercial, and utility-scale applications.
