

# Photovoltaic energy storage construction and operation and maintenance

## Overview

---

This page provides information to assist with the operation and maintenance (O&M) of photovoltaic (PV) systems. Return to the Life Cycle of PV Systems. This report is available at no cost from the National Renewable Energy Laboratory (NREL) at [www.nrel.gov](http://www.nrel.gov). National Renewable Energy Laboratory, Sandia National Laboratory, SunSpec Alliance, and the SunShot National Laboratory Multiyear Partnership (SuNLaMP) PV O&M Best Practices. After solar energy arrays are installed, they must undergo operations and maintenance (O&M) to function properly and meet energy production targets over the lifecycle of the solar system and extend its life. Reported O&M costs vary widely, and a more standardized approach to planning and delivering O&M can make costs more predictable approaches evident in the wind industry. With this gap in mind, this report aims to provide.
