

# Photovoltaic energy storage sector is positive

## Overview

---

The solar energy storage industry is expected to witness tremendous growth, led by growing environmental awareness and strict emission reduction policies. The growing focus on energy conservation programs will drive market growth. We must transition to clean energy solutions that drastically. Energy storage is the linchpin of the clean energy transition, which is reflected by the energy storage market's meteoric growth. Wood Mackenzie, a leading global provider of data for the energy sector, shows a 100% increase in 2022-23, with another 45% jump expected in 2024. The first quarter of. Cleantech, which includes renewable energy and energy storage, is playing a key part in the decentralization and digitalization of the power system, or the so-called Energy Transition that is now on the agenda of nearly all companies, governments and institutions. 5 billion in 2034, at a CAGR of 17.
