

Photovoltaic panel laying line drawings

Overview

These are precise, computer-aided design drawings (think AutoCAD or similar) that lay out everything for your PV system: panel placement, wiring routes, structural attachments, grounding/earthing, electrical flow, etc. This diagram is the electrical roadmap of your photovoltaic installation, providing a clear, concise overview of the entire system for the Authority Having Jurisdiction (AHJ) submission. A successful SLD includes all major components, from the PV modules to the point of interconnection, detailing. If you're working on a single solar site in the U., whether a rooftop in California, a commercial warehouse in Texas, or a ground-mounted farm in the Midwest, then the CAD drawings are your blueprint. It also enables our design drawing partners to quickly generate an electrical drawing or complete permit plan set for your project. You can see samples of these here: [Sample Permit Plan](#). Achieve optimum designs of all your SolarEdge systems with minimal time and effort using a range of automated innovative tools Streamline your designs with an easy-to-use interface that seamlessly integrates a single design across multiple platforms like Autocad, PVsyst, and the SolarEdge.
