Overview

- Q1 2025 module imports into the United States fell 14% q/q, hitting only 6.4 GW dc of PV cells in Q1 2025, leveling off the meteoric growth from last 18 months. The Tier 1 list of solar panel manufacturers for the first quarter of 2025 has been published by Bloomberg New Energy Finance. This ranking is one of the most important in the photovoltaic industry, as it reflects the bankability of manufacturers—a key criterion for investors and developers of.
- In 2024, between 554 GW dc and 602 GW dc of PV were added globally, bringing the cumulative installed capacity to 2.2 TW dc
- China continued to dominate the global market, representing ~60% of 2024 installs, up 52% y/y.
- The IEA reported Pakistan's rapid. Note: This Tier 1 ranking is based solely on the financial stability of the manufacturers and should not be interpreted as a measure of solar panel performance or quality. When selecting solar panels for your project, it's important to consider additional factors such as efficiency, warranty. Bloomberg maintains a tiering system for photovoltaic (pv) module (solar panel) manufacturers based on bankability, to create a transparent differentiation between the numerous players in the market. Department of Energy (DOE) Solar Energy Technologies Office (SETO) and its national laboratory partners analyze cost data for U. solar photovoltaic (PV) systems to develop cost benchmarks. These benchmarks help measure progress toward goals for reducing solar electricity costs.
